

GlobeWeigh Aweighsys Software Systems

“Regain Full Control of Your Business”

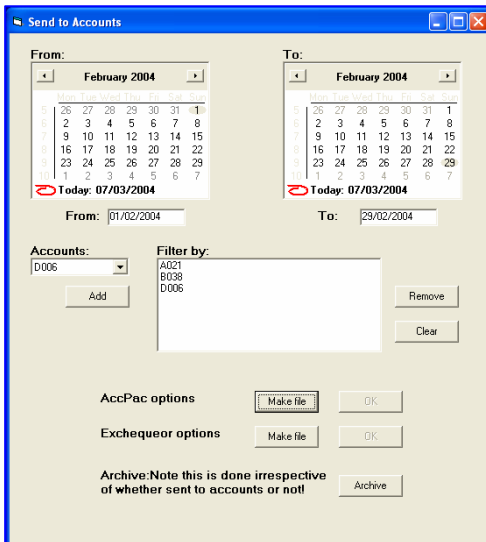

Industry today has reached a level of complexity which requires powerful management tools to deal with the variety of:

- Products
- Clients
- Prices
- Contracts
- Documentation
- Legislation
- Traceability
- Duty of Care
- Invoicing
- Reporting
- Analysis & Costing
- Links to Accounts and Other Software

Attempting to manually perform these tasks leads to:

- Increased working hours
- More paperwork
- Extra staff costs
- Inaccuracies in documentation
- Time delays in invoicing
- Cash flow problems
- Inadequate management information and analysis

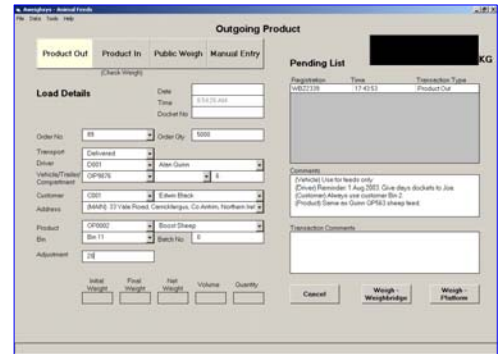

When the level of complexity reaches the point, where it is becoming almost impossible to manage, it is time to consider implementing a software system to automate and monitor the task.

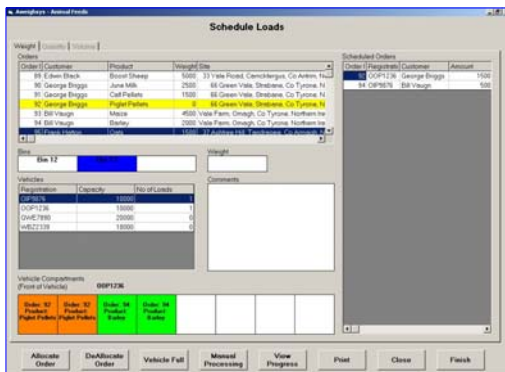

The **Globeweigh Aweighsys Software Systems** are written in-house and are available in the following dedicated versions:

Animal Feeds – Dedicated System for the Animal Feeds Industry

The Aweighsys Animal Feeds System has been designed exclusively for the Animal Feeds industry. The variety of mixed feeds, additives, medicated ingredients and price fluctuations in raw materials, to list but a few factors, all contribute to a constantly changing industry which presents an increasing managerial challenge. In addition there is the ever increasing amount of legislation which Animal Feeds providers must comply with – traceability, labels and warnings for medication, reports for total feeds bought and sold and much more.

The Aweighsys Animal Feeds System enables you to:

- Record all incoming loads, outgoing loads and mixes
- Maintain full end product and batch traceability
- Configure dockets to any desired layout, incorporating medication details etc.
- Generate a wide range of management reports for business analysis

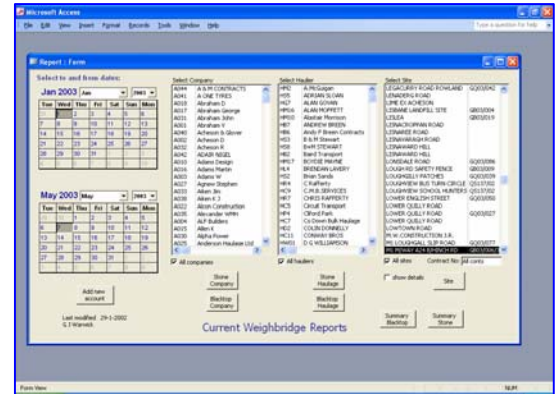

- Schedule loads to optimize vehicle utilisation and comply with statutory regulations
- Interchange data with leading accounts systems
- Reprint old dockets quickly and easily
- This system can be extended to integrate with driver-operated panels and traffic control devices.

***Current users of this system include
Gortavoy Feeds & McGuckian Feeds***

Quarry System

This system enables you to:

- Price material by customer/contract/site etc
- Price by weight, cubic metre, bale, load etc
- Utilise radial mileage/bands to calculate prices
- Calculate haulier rates and “self billing” invoices
- Produce invoices – e.g. single line per transaction

- Link to accounts systems – e.g. Sage, AccPac, Exchequer etc
- Full reports suite
- This system can be extended to integrate with driver-operated panels and traffic control devices.

Current users of this system include:

Crozier Quarry, Gibson Bros, McDaid Quarry, Grogan's Quarries, Lisheen Mines, K J & Sons Kildare, N & C Enterprises Kildare

Waste & Recycling (Including Councils)

This system enables you to carry out a variety of tasks depending on the version supplied including:

- Landfill, Amenity Sites, Skip Hire, Kerbside Collection, General Waste
- Comprehensive docket/driver schedule/ transfer note production
- Duty of Care and Season Ticket compliant
- Waste category files

- Invoicing
