

Typical Pit Weighbridge Installation Bryson House Recycling - Mallusk

Bryson House Recycling operates a number of schemes to help save energy reduce waste and protect the environment. Bryson House has been appointed to provide its doorstep recycling services to 25% of homes in Northern Ireland. An estimated 15,000 tonnes of material will be collected for recycling annually. All materials will be processed at their new site in Mallusk Belfast where Globeweigh have completed a contract to install a new weighbridge, re-site a second and a software system.

**Foundations prepared by
builder**

**Six plates with 300mm x 400mm
steel plate cast into foundations**

Deck in place with channel surround

**Concrete finish up to the channel
surround leaves a tidy installation**

**Bryson House Vehicle on the
Weighbridge**
