

Complete Cattle Weighing Solutions

Monitoring Weigh Gain....

from

Ireland's Leading Industrial Weighing Manufacturer

GlobeWeigh 

Superior performance and reliability - without compromise

Accurate livestock weighing is vital in the day to day running of a modern farm. It provides information and insight into the general health and performance of animals, ensuring increased farm yields and profitability. In turn strategic farm management decisions can be made using accurate livestock weight.

Designed for optimum strength and durability in the harshest environments - Available in capacities up to 2000kg – Standard size 2400mm (96") length and 660mm (26") width, option is available for varying sizes.

Advantages of a GlobeWeigh Cattle Weigher:

- Portable - Lightweight and easy to move
- Fits easily into current crush or cattle race
- Strength and durability
- Easy to install and maintain
- Simple, cost effective design
- IP68 stainless steel analogue load cells
- Accurate, fast weighing up to 2000 kg
- Non slip aluminum floor

Weight Terminals

The FX1 is an electronic weighing indicator with a tough polycarbonate weather proof and dust proof casing. Powered through a 12 volt supply.

Designed with livestock weighing in mind there are two weighing modes – "HOLD" for livestock weighing and "Free" for all other weighing. The FX1 automatically zeros itself – simply turn it on and you are weighing.

12 month return to base warranty. End user is responsible for placing the weigher in a safe environment and operating in a safe manner.
