In the world of **WEIGHING & LABELLING**, *speed & precision* are essential

GLP MAXX LABELLER

BOX LABELLING

Our range of box labellers provide automated solutions for end of line labelling of boxes. Our box labeller units can be integrated with weighing units to offer a complete labelling solution or used for checkweighing boxes and automatic labelling.

Box labellers can be customised to requirements.

- Labelling can be performed from the side and from the top
- Stroke length 350mm or 700mm
- Label sizes up to DIN A5
- Print area up to 160mm wide
- By combining throughput scales, weighing data can also be printed
- Throughput of up to 45 packs per minute can be achieved

The GLPmaxx can be used as a label printer for product labeling in the food processing industry as well as in manufacturing trade and logistics. In combination with the Bizerba weighing technology it is the perfect starter kit for manual price labelling.

- Operating terminal GT-7C with 7" color display
- 2 GB memory on board for article and layout data Program updates, line backups, backup and service printouts are possible with the external USB port.
- The internal USB port can be used for logging of process data, e.g. for statistical evaluations.
- Processing of linerless labels
- Printing and processing of any one and two-dimensional standard barcodes, among other things data matrix and QR code
- Easy label roll change
- Print width 56 mm (optionally 80 mm)

ZEBRA ZT 220 NON WEIGH

Designed with ease-of-use in mind, the ZT200 Series offers reliable printing for a wide variety of applications. Whether you are adopting barcoding for the first time, upgrading your printers or replacing printer models, the ZT220 Series offers the right choice for most labelling applications.

Compact footprint fits where space is at a premium - The ZT220 Series printer's compact design, when closed and opened, fits easily in constrained work areas. The ergonomic Bi-fold door requires only 4" (102mm) of door swing room. This reduces the printer height making it ideal for placement under a shelf or against another item.

The ZT220 has a print width of 104mm with a print resolution of 203dpi/8 dots per mm.

NON UNIFORM

The Bizerba GLM-I V-Belt is an ideal solution for any non-uniform product weighing. The V-Belt design provides stability to weigh at faster speeds, while also allowing a more accurate application of labels using a rotary applicator. This allows the machine to run with a throughput of up to 40 items per minute, depending on the item dimensions.

The V-Belt is the perfect machine for labelling pork joints, lamb legs/shoulders, beef joints, broccoli, swede/turnips, cauliflower, melons or any other product for which stability would normally be a problem.

Added benefits are:

- Fast return on investment by providing increased efficiency
- Adaptable labelling for current and future EU label legislation

MULTI-HEAD & FLASH

Multi-head labelling machines help increase throughput, minimise downtime and reduce labour costs. Our GLM-I labelling machine can have up to six labellers set-up to deliver top and bottom labelling together with integrated label applicators for flash labelling.

All labellers are controlled from the one colour touchscreen for ease of operation and as a product is selected it can automatically activate either one or any combination of labellers depending on customer requirements.

Product selection can also automatically adjust the labeller height to match variances in pack heights.

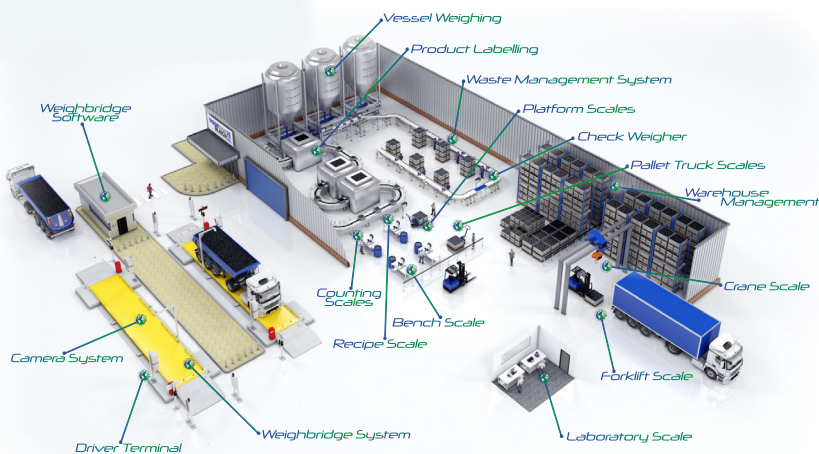

As one product is being labelled using one combination of labellers then others may be set up ready for the next customer/product to minimise downtime.

LINERLESS LABELLING

GLM-I CleanCut is the labelling system for a visually appealing presentation of your products even for a large amount of information. Increase the buying interest of your products and produce less waste at the same time.

GLM-I CleanCut is suitable for numerous products including meat, produce, seafood, ready meals and baked goods. Intelligent labelling technology is adapted to the properties of Bizerba CleanCut linerless labels ensuring perfect interaction and best possible labelling results. For companies aiming to improve their labelling process, the GLM-I CleanCut industrial labelling system is a significant step forward in terms of performance, sustainability and presentation. A comprehensive solution combining advanced labelling technology with the efficiency and environmental benefits of linerless labels.

Comprehensive Service & Support

KEEPING YOUR CRITICAL WEIGHING EQUIPMENT IN TIP-TOP CONDITION

We appreciate and understand the importance of a well defined and implemented service and maintenance program. Your equipment and installation have their own specific requirements and will only perform as well as the maintenance program you have in place. Our support packages are designed to suit your exact needs, giving you time to focus on the efficient running of your business, without having to worry about breakdowns. Service visits are arranged to suit your company's working pattern and we can fit in with scheduled shutdowns or plan visits during evenings and week-ends. If your equipment is used more extensively at certain times of the year due to seasonal influences, we will assess this and provide a plan that is just right for your business.

SERVICE & SUPPORT – WHEN AND WHERE YOU NEED IT!

Globeweigh offers a comprehensive service, calibration and support capability for a wide range of industrial weighing equipment throughout Ireland. We support both our own and other manufacturers' weighing equipment, and packages can be tailored to meet your specific operational and fiscal requirements.

Service is available from our centres in Armagh and Cork, with 24 hour cover also available for companies operating around the clock and at weekends.

GlobeWeigh providing TOTAL SOLUTIONS

FROM WEIGH PRICE LABELLERS TO WEIGHBRIDGES TO BENCH SCALES

Globeweigh's skilled engineers are trained to support a diverse range of weighing equipment from laboratory balances through to weighbridges. Our core philosophy is based on identifying and remedying any potential problems ahead of time, thereby optimising your equipment 'uptime'. Contact us to find out more about service and support

programs for automatic and non-automatic weighing equipment and instrumentation including: **Weighbridges, Bench scales, Floor scales, Counting scales, Weigh price labellers, Pallet truck scales, Forklift truck scales, Crane scales, Laboratory scales, Hopper scales, Tank & silo weighing systems, Mechanical scales, Axle weighers and Check weighers.**

 Coverage for public & bank holidays
 Priority four hour response time

Coverage for week-ends
