WAREHOUSE

MANAGEMENT

SOFTWARE FEATURES:

- Intake
- Real Time Stock Control
- Quality Control
- Traceability
- Production Labelling
- Order Picking
- Container Loading
- Customer Login

# POWERFUL WAREHOUSE MANAGEMENT SOFTWARE

GlobeWeigh Warehouse Management System has been developed to give the customer peace of mind when sending goods for storage and distribution. Right from intake to dispatch the system allows easy user functionality from input of data, to printing of labels and placement of the pallets.

SOFTWARE

- Pallet Intake
- Order Picking sent straight to PDA's
- Real Time Stock Viewer for customer
- Container Loading
- Mixed Pallet Functionality
- Stock Taking/Reconciliation
- Stock Rotation
- Advanced Shipping Notice
- Monthly Costing Facility
- Quality Control
- Report Module
- Traceability
- Integration into Accounts Packages
- Ambient Freezer and Chill

HARDWARE

As part of the package GlobeWeigh can offer a complete solution including hardware as:

- Touchscreen system & Printers
- Hand Held Units
- Weighing platforms
- Label and Document Printers
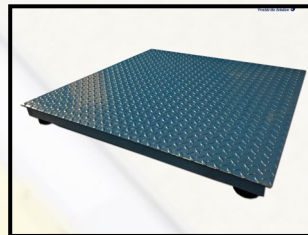

INTAKE/DISPATCH

On arrival or prior to arrival details of pallets arriving can be entered which will produce a label for each pallet giving information as:

- Unique Pallet Number
- Customer Names
- Customer Pallet Reference
- Product Name
- Number of units on pallet
- Batch Number
- Barcode
- Use by Dates

Customers can send advice notes prior to vehicle arriving to have the information pre loaded onto the software.

GIVING FULL TRACEABILITY AND QUALITY CONTROL

Traceability and accountability is essential in business and with GlobeWeigh software you can have peace of mind that when pallets are brought to the warehouse you have full records and traceability at any stage. With relevant hardware pallets can be weighed, photographed, labelled and temperature recorded.

PRODUCTION LABELLING

All production items can be labelled for pallet identity. This will include dates (use by / production dates) as well as batch number's and product codes. This will be included as components in the barcode for later scanning for identity / data retrieval. There will also be human readable details on the label for the operator to read for identity. When production labelling – each item (box, container, pack) can be labelled individually or just the overall pallet. This allows then for pallets to be split for smaller orders rather than having to dispatch full pallets. All the labelled pallets are automatically added to stock and consumed / reduced when dispatched. This maintains stock levels and traceability.

REPORTING

Reporting can be done via an extensive report search or a simple report search giving the following:

- Intake
- Stock Reconciliation
- Locations

Stock Report can be filtered by the following:

- Customer
- Supplier
- Batch Number
- Use Before Date
- Product

AUTOMATION

All locations are labelled with unique references as is each pallet. When a pallet is placed into a position the user scans the barcode on the pallet and then the barcode for the location which then links back to the main database allocating it. This can all be done from the safety of the cab.

Orders are allocated from the office which is then sent to the hand held device giving picking list and pallet locations for picking.

With the correct module customers can log in and access full stock list including current best before dates.

OUR SERVICES

Comprehensive service and support – when and where you need it!

Globeweigh offers a comprehensive service, calibration and support capability for a wide range of industrial weighing equipment throughout Ireland. We support both our own and other manufacturers' weighing equipment, and packages can be tailored to meet your specific operational and fiscal requirements.

Service is available from our centres in Armagh, Kildare and Cork, with 24 hour cover also available for companies operating around the clock and at weekends.

KEEPING YOUR CRITICAL WEIGHING EQUIPMENT IN TIP-TOP CONDITION

We appreciate and understand the importance of a well defined and implemented service and maintenance program. Your equipment and installation have their own specific requirements and will only perform as well as the maintenance program you have in place. Our support packages are designed to suit your exact needs, giving you time to focus on the efficient running of your business, without having to worry about breakdowns.

Service visits are arranged to suit your company's working pattern and we can fit in with scheduled shutdowns or plan visits during evenings and week-ends. If your equipment is used more extensively at certain times of the year due to seasonal influences, we will assess this and provide a plan that is just right for your business.

ARMAGH

KILDARE

CORK
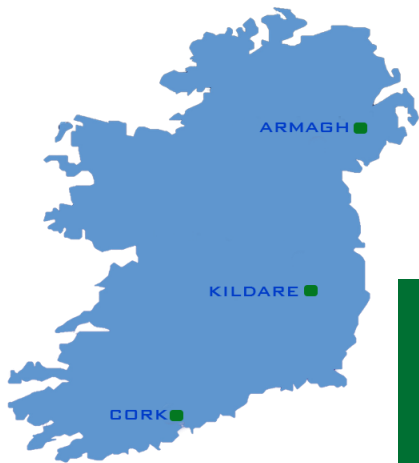

• Coverage for all public and bank holidays
• Coverage for week-ends
• Priority four hour response time
• 24 hour telephone support

24/7 SERVICE

TOTAL SOLUTIONS

FROM WEIGH PRICE LABELLERS TO WEIGHBRIDGES TO BENCH SCALES

Globeweigh's skilled engineers are trained to support a diverse range of weighing equipment from laboratory balances through to weighbridges. Our core philosophy is based on identifying and remedying any potential problems ahead of time, thereby optimising your equipment 'uptime'. Contact us to find out more about service and support programs for automatic and non-automatic weighing equipment and instrumentation including:

Weighbridges, Bench scales, Floor scales, Counting scales, Weigh price labellers, Pallet truck scales, Forklift truck scales, Crane scales, Laboratory scales, Hopper scales, Tank & silo weighing systems, Mechanical scales, Axle weighers and Check weighers.
