

**Location:** Manor Farm Feeds, Co. Cavan

**Year:** 2020

**Product:** GlobeWeigh Eurodeck Weighbridge & Touchscreen Driver Terminals

Manor Farm Feeds based in Shercock, Co. Cavan supplies poultry feed to their growers. Manufacturing approximately 3,500 tonnes of poultry feed a week the company is one of the oldest run concerns in the country and dates back to 1775.

### The Project

GlobeWeigh has maintained the Manor Farm's existing weighbridge for the last few years. In addition we have provided a comprehensive bespoke weighbridge software system which collects data and interfaces with Manor Farms feed mill processing software.

With increased production Manor Farm needed a second weighbridge for incoming raw materials. The new weighbridge required a level of automation for drivers.

### Our Experience

GlobeWeigh has been manufacturing weighbridges in Co Armagh for 25 years was chosen as the preferred supplier of the weighbridge, automation and software solution. Globeweigh has been a partner with Weightron Bilanciai - Europe's leading weighbridge manufacturers - a worldwide company.

### The Result

Manor Farm ordered an 18m x 3m Eurodeck all steel pit mounted weighbridge.

In addition we supplied two touchscreen driver terminals. We also supplied the bespoke software. It was installed at the laboratory to record results from spear tests such as moisture, bushel and temperature.

As a precaution the system allows for additional checks to ensure material cannot be loaded into the wrong silo.

When the driver arrives on site he enters all relevant data onto the touchscreen terminal. The data is live on the system and on completion of the transaction the data is updated automatically. This can be viewed by all relevant personnel.
